

37mm Filter-Keeper™ in storage/archiving tray

M HOLDS 25MM AND 37MM

M HOLDS FILTERS IMMOBILE

M STATIC DISSIPATIVE

M LIGHTWEIGHT

! ARCHIVING TRAYS AVAILABLE

For years there has been plastic storage devices that would hold filters for archiving and or protecting them from further contamination.

However those devices were designed to hold 47mm filters. When 37mm or 25mm filters were stored in such containers, the filters would “rattle” around and the contaminant caught on the filters would come into contact with the inside surface of the container, risking transfer of the contaminant onto that surface.

Static electricity inherent in plastic containers, worsen this problem.

Omega's Filter-Keeper™ puts an end to these problems.

The Filter-Keeper is designed for storing 37mm and 25mm filters. When closed, the clam-shell design, of the Filter-Keeper, holds the filter by pressing on its periphery, on the area that was covered by the cassette. The surface of the filter remains several millimeters away from any surface. This design, plus the static dissipative nature of the plastic used to make the Filter-Keeper, minimizes loss of collected contaminant.

Most people that archive filters need to have a convenient way of retrieving specific samples. Omega has made available a set of trays that will store the Filter-Keepers in a flat horizontal plane.

Storing filters on their side can lead to deterioration of particulate samples integrity.

The Filter-Keepers are available in a starter storage archiving styrene tray set that holds 48 units. The starter set is infinitely expandable by simply adding more trays as your collection of samples increases. Each tray holds 8 units and is numbered on the edge, Row A&B, and each column, marked by the Roman numeral I to IV. Each tray has a spot that you can label from 1 ... to infinity, thus allowing you to pinpoint any Filter-Keeper slot in you collection. Filter keepers are also available in bulk in packs of 100. 25mm Filter-Keepers have the same “footprint” as the 37mm and can be stored in the same trays.

ORDERING INFORMATION

A-FLTKPR3700	Filter-Keeper™ 37mm 100/pk w ith labels
A-FLTKPR37-KT	Filter-Keeper™ 37mm with Archiving trays & labels 48/pk
A-FLTKPR2500	Filter-Keeper™ 25mm 100/pk with labels
A-FLTKPR25-KT	Filter-Keeper™ 25mm with Archiving trays & labels 48/pk
A-TRAY-48-6	Set of 6 archiving trays no Filter-Keepers™
